An Australian Leader in  
the Supply of Water Coolers

## D5

The Waterworks D5 Series water coolers are Australia's number one selling, mains pressure, drain free units. Preferred by the filtration industry because of their build quality, reliability and their huge, 12 litre cooling reservoir, they provide a cost effective means of supplying Cool & Hold or Hot and Cold water without the hassle of storing and changing spring water bottles. They are also ideally suited to the addition of filtration systems.

- Mains pressure (Drain-Free)
- Available in Cool & Cold or Hot & Cold.
- Approximately 5 litres per hour cooling performance.
- Child resistant safety tap for hot water units.
- Matching cup dispensers available.
- Bench Top versions (SD5) also available
- Dimensions 310mm (W) x 310mm (D) x 1040mm (H)
