An Australian Leader in  
the Supply of Water Coolers

#### AN-1

The AN1 Aquanet filter has been specifically designed by Waterworks to compliment our biggest selling bottle top water coolers, (B5, SB5 and B10 Series) and they will also fit many other bottle top products including wells, crocks and other models of water cooler. These gravity filters utilise Silver Impregnated, Granular Activated Carbon, (GAC) to reduce Chemicals, Tastes, Odours and water borne sediments in your drinking water before the water is delivered from the bottle, into the water cooler.

- Specifically designed for B5, SB5 and B10 Series water coolers
- Will fit many other coolers and water dispensers.
- Chemical reduction.
- Sediment reduction.
- Taste and Odour reduction.
- Simple installation and operation
- Drop onto top of cooler and place full water bottle on top.
- Filter life will depend on water quality but as a general guide each filter will last around 6 months.
