**An Australian Leader in
the Supply of Water Coolers**

IC1000

The Waterworks IC1000 water coolers are industrial sized remote coolers specifically designed to cope with the extremely high demands of applications such as schools, mining camps and sporting venues. Because all of these applications use large quantities of water, all at once the massive storage capacity of the IC1000 is ideal, while the superior insulation ensures that the water is maintained at temperature for longer with a minimum of energy consumption

- Industrial sized, remote mains pressure water cooler.
- Dynamic condensing refrigeration system.
- Stainless steel waterways
- Stainless steel 60 litre cooling reservoir.
- Can be adapted to a variety of tapware to suit your application.
- Approximately 120 litres per hour cooling performance.
- Durable powder coated cabinet.
- Dimensions: 8040mm W x 6440mm D x 8060mm H.
