AQUA COOLER®

WATER RESERVOIR

The B22 has a stainless steel tank, which holds approximately 1.8 litres of chilled water during normal usage. It has a chilling capacity of 5 litres per hour during peak periods.

REFRIGERATION

The system B22 uses 82 Gms of refrigerant R134A, which is non-toxic, non-flammable and non-ozone depleting. Refrigerant flow is controlled by a capillary tube, which has no moving parts.

TEMPERATURE CONTROL

The thermostats are factory pre-set.

COMPRESSORS

1/16 h.p. capacity, 49 watts. The compressor is hermetically sealed for silent running

CONDENSER

All copper tube and aluminium fin construction, which is fan assisted to efficiently remove heat.

ELECTRICAL

240 volts, 50Hz. A 2 metre house cable and 3 pin plug are supplied. Full load current is 0.81amps

PERFORMANCE TO ARI 1010-94 STANDARD

Inlet water - 26.7°C
Outlet water - 10°C
Ambient Air - 32.2°C
